

Cover Crop Cost Share Available

In 2016, Licking County Cover Crop Cost Share producers planted over 1,000 acres of cover crops and kept over:

- 200 tons of soil from eroding into our streams,
- 2,000 pounds of phosphorous on the land, and
- 4,500 pounds of nitrogen out of the waterways.

Requirements:

- Must use certified seed or submit an approved germination test completed by ODA.
- Notify SWCD within 5 days of seeding.
- Seeding rates and dates must meet NRCS Standards (See attached)

Application Process:

- Applications will follow a ranking process, if approved an agreement will be sent out.
- Tillage/planting information and FSA map must be provided with application
- Application available at Soil & Water office or online at www.lickingswcd.com
- **Deadline June 19, 2017**

Cover Crop Aerial Planting Program now offered

Aerial application can be the answer to getting an established cover crop stand after soybeans, without having to worry about the weather and getting back into the field after harvest. Applying the seed from the air before harvest allows the seed time to germinate and establish itself while the soybeans are drying up.

Licking SWCD will buy the seed in bulk and pass the savings on to the producer.

Cost share program is separate but can be used in conjunction. Contact Chodd Armfelt for pricing and details.

Questions? Contact Chodd Armfelt at 740-670-5330 or choddarmfelt@lickingswcd.com
