CONSERVATION NOTES

Mission: To promote conservation of natural resources through local leadership, education and technical assistance.

Welcome Urban Conservation Specialist Zach Bollheimer

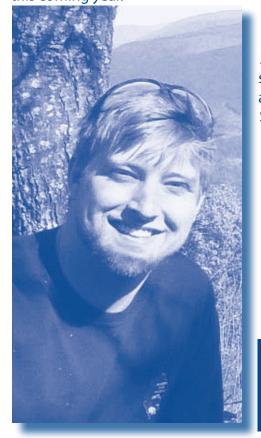

icking Soil & Water welcomes Zach Bollheimer. As the Urban Conservation Specialist, Bollheimer will assist Licking Soil & Water serve the urban conservation needs of the county. Bollheimer is originally from the small farming town of Fort Loramie, OH. He graduated with a Bachelor's degree in Environmental Geography from Ohio University in 2012.

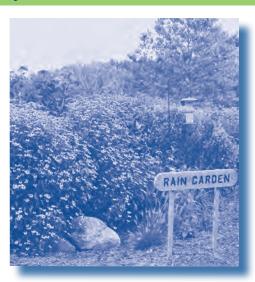

Before joining the Licking Soil & Water team, he led a natural resource management crew with the National Park Service at Cumberland Gap National Historic Park in Middlesboro, KY. Previously, he held a variety of positions related to soil and water conservation, including salmon habitat restoration efforts with the Washington Conservation Corps in Washington State, interning at the Ohio EPA Division of Surface Water, and working on an organic dairy farm.

In the coming months, Bollheimer will participate in several Soil & Water initiatives in both a technical and educational capacity. His main focus will be on stormwater, which is the water that originates from a rain or snow event. Bollheimer believes his biggest tasks will be detecting

and eliminating sources of polluted stormwater, continuing to map our current stormwater system, and ensuring clean stormwater through public participation, education, and outreach.

Outside of work, Bollheimer enjoys camping, bicycling, gardening, live music, and getting to know the local area. He is very happy to be serving the Licking County community and looks forward to meeting many of you this coming year.

Winter Snow and Spring Showers

fter much wintery weather, the snow has turned to rain. As snow melts and rain falls, stormwater picks up pollutants as it flows over the landscape. Stormwater is the water running down the street and other impervious surfaces during and after a storm. Pollutants include lawn care products, oil, sediment, and pet waste. Unfortunately these pollutants are carried directly into rivers and streams. This means that pollutants are flowing untreated into drinking water sources.

Winding Trails Maple Syrup Jim and Lynna Kiracofe 11406 Stout Rd., Utica, Ohio jim.kiracofe@gmail.com 740-745-2759

Winding Trails maple syrup originated on our family farm in the hills of Licking County Ohio.

This maple syrup was produced by collecting sap from sugar maple trees in March when the nights are cold and the days have enough warmth to hint of the coming spring. About fifty gallons of sap are boiled down to make one gallons of delicious maple syrup, the original, natural sweetener.

Enjoy on a stack of pancakes, drizzled on your favorite ice cream or in your next cup of coffee.

> Jim and Lynna Kiracofe Winding Trails Maple Syrup

(Stormwater, continued from page 1)

How can we reduce the pollution in stormwater? Some estimates put the amount of rain that flows off an average roof, over the course of a year, as enough to fill 500 bathtubs. Instead of allowing that rain to flow down the driveway or sidewalk and to the nearest storm drain, it is possible to divert the rain water. Here are three ways to help reduce stormwater:

- Consider using a downspout extender to direct rain water onto lawns and landscaped areas.
- Purchase a rain barrel or attend a rain barrel building workshop. Once attached to a downspout, the rain barrel directs rain water into the barrel. This action not only reduces stormwater, but it also supplies free fresh water for watering plants.
- Investigate installing a rain garden and/or landscaping with native plants. Rain gardens are created with highly absorbent soil and the proper mix of plants to facilitate collecting water and letting it naturally soak into the ground. Native plants are acclimated to the local environment, and can provide food and shelter for local wildlife, including pollinators.

Next time you see water running down the street during or after a rain storm, consider what is in that water and how you can help to make that water cleaner. For more information about reducing stormwater or keeping our waterways healthy, contact Zach Bollheimer at zachbollheimer@lickingSWCD. com or (740) 670-5330. (Adapted from the Trumbull SWCD spring newsletter).

PLEASE NOTE: All orders are subject to availability. Orders are filled on a first-come, first-served basis. There is no limit to the number of seedling trees ordered. Please include payment with your order. **All orders are due by Friday, March 27, 2015. Pick-up date is Friday, April 10, 2015, 8:30 a.m. to 7:00 p.m.**, at the Licking County Soil & Water Conservation District office. All trees are state and federally inspected. We may need to make reasonable substitutions based on availability of certain species. **All trees are bare-root seedlings four (4) to eighteen (18) inches in height.**

WILDFLOWER SEED:

One ounce (1 oz.) of annual and perennials seeds sow 100 to 200 square feet, \$4.00. Tentative species: Partridge Pea, Lanceleaf Coreopsis, Blackeyed Susan, Purple Coneflower, Marsh Blazing Star, Butterfly Milkweed, Nodding Onion, New England Aster, Little Bluestem, Virginia Wildrye, Rattlesnakemaster, Tall White Beardtongue, Ohio Spiderwort, Sulphur Cosmos, Cosmos, Annual Gaillardia, and California Orange Poppy

Tree Selection Considerations

- **1.Why is this tree being planted?** Consider uses and environmental benefits including shade, fruit, seasonal color, windbreak or screen, and wildlife habitat.
- 2. What is the size and location of the planting site? Consider mature tree size; nearby overhead or underground utilities; building foundations; septic tanks and leach fields; property lines; or other barriers that can restrict growth. Locate all underground utilities prior to digging by calling the Ohio Utilities Protection Service (OUPS) at 1-800-362-2764.
- **3. What soil types exist?** Consider the soil type, depth, fertility, compaction, moisture, and drainage.
- **4.** How much sun or shade exists? Consider the number of hours of sun or shade on most summer days.

2015 Rain Barrel Order Form

Barrels may be picked up at the Soil & Water office. Please call first, 740-670-5330, to confirm availability.

	Seedling Tree Descriptions												
	Tree/Shrub Name	Mature Height	Mature Width	Soil Moisture	Soil pH	Growth Rate	Light	Comments/Uses					
Evergreens	Eastern White Cedar/ American Arborvitae Thuja occidentalis (4"-8")	20' - 60'	10' - 15'	M, W	А	S-M	S	well-adapted to wide-range of soil types and moisture levels, wildlife, wood products					
	Norway Spruce <i>Picea abie</i> s (10"-18")	60' - 80'	20' - 40'	D, M, W	A, N	F	S	landscaping, windbreaks, wildlife					
	White Pine Pinus strobus (7"-10")	60' - 80'	20' - 40'	М	A, N	F	S	windbreaks, timber, wildlife					
	Bald Cypress (6"-12") Taxodium distichum	50'- 100'	20' - 40'	D, M, W	А	М	S, P	deciduous conifer, wetland species, timber, wildlife					
	American Sweetgum <i>Liqiudamber styraciflua</i>	30' - 50'	15' - 30'	M, W	A, N	M-F	S	gold-orange-burgundy fall color, landscape					
	American Redbud Cercis canadensis (6"-12")	25' - 30'	26' - 33'	M, W	В	М	S, P	adaptable, abundant lavender flowers					
	Black Gum/Tupelo Nyssa sylvatica (6"-12")	60' - 90'	20' - 30'	W	Α	M	S, P	glossy dark green summer foliage and outstanding autumn foliage colors					
	Black Walnut (6"-12") Juglans nigra	50' - 70'	50' - 70'	D, M, W	A, N	F	S	nuts, timber, wildlife					
Decidnous Trees	Hackberry Celtis occidentalis (6"-12")	50' - 60'	70' - 80'	D, M, W	N	M-F	S	adaptable, interesting bark, fruit loved by Bluebirds and other wildlife					
	Kentucky Coffeetree (6″-12″) Gymnocladus dioicus	70' - 80'	40' - 50'	M, W	N, B	S	S, P	fruit pods on female trees, some parts poisonous to humans and livestock					
	Ohio Buckeye Aesculus glabra (6"-12")	45' - 70'	20′-30′	М	A, N	M-F	S, P, SH	Ohio's State Tree, creamy white flowers, early to leaf out in spring, poisonous to humans and livestock					
	Red Oak <i>Quercus rubra</i> (6"-12")	50' - 60'	50' - 60'	D, M	N	F	S	tolerates dry conditions, landscape, timber					
	Sassafras (6″-12″) Sassafras albidum	40' - 50'	20' - 30'	M, W	А	F	S, P	fall color, twigs have spicy aroma, tea can be made from roots, mul- tiple leaf forms					
	Shellbark Hickory Carya laciniosa (6"-12")	100'- 120'	74' - 80'	W	А	М	S, P	does great in floodplains, bottom lands and flatlands that do not drain quickly					
	Smooth Sumac Rhus glabra (6"-12")	12'- 15'	12' - 15'	D, M	N	F	S	interesting structure, flowers & fruit, great fall color, very adaptable (ex- cept wet soils), beneficial to wildlife					
	Sugar Maple Acer saccharum	60' - 80'	20' - 40'	М	N	S-M	S	landscaping, timber, orange fall color, maple syrup					
	Sycamore (6"-12") Platanus occidentalis	70' - 90'	50' - 60'	M, W	N	M-F	S, P	interesting bark, tolerates wet, well-drained soils					
	Tuliptree (6"-12") Liriodendron tulipifera	70' - 90'	35' - 45'	М	N	F	S	yellow-orange flowers, timber					
	White Flowering Dogwood Cornus florida (6″-12″)	20' - 30'	20' - 25'	М	Α	S	S, P	four-season appeal, white flowers, red-purple fall color					
	White Oak <i>Quercus alba</i> (6"-12")	50' - 70'	50' - 70'	D, M, W	N	S-M	S, P	timber, very beneficial to wildlife and ecosystems					
Soil Moisture: D = dry M = medium W = wet Light: S = sun P = part sun/shade SH = shade Soil pH: A = acidic (6.5 -or less) N = norm Growth Rate: S = slow 2"-6"/year M = r

Programs in Partnership with Park District

DIY Rain Barrel Workshop: Saturday June 13 from 10 a.m. – 12 p.m. at Kraner Nature Center, 10383 Fairview Rd, Newark. Cost: \$50.00

Stream Team Water Quality Monitor Workshops: Sunday, April 19 from 6 – 8 p.m. at Lobdell Reserve, Disc Golf Parking Area on Battee Rd, Alexandria and Thursday, June 25 from 6 – 8 p.m. at Riverview Preserve, 375 Ohio Street, Newark. Cost: Free

Project Learning Tree Educator Workshop: Tuesday, June 23 from 9 a.m. - 4 p.m. at Kraner Nature Center, 10383 Fairview Rd, Newark. Project Learning Tree (PLT) helps educators with balanced, non-biased learning experiences for early childhood through 12th grade that encompass the total environment -- land, air, water, plants, and animals -- including humans. PLT activities are correlated to state and national education standards. PLT uses the forest as a "window" into the natural world, helping young people gain an awareness and knowledge of the world around them, as well as their place within it. PLT works in the city or the country, indoors or out-of-doors, whether there is a single tree or a forest. Visit http://forestry.ohiodnr.gov/plt to learn more about PLT. Cost: \$10 Licking County educator or resident, \$25 out of county.

Pre-registration is required due to limited space. RSVP by calling 740-670-5330 or e-mail information@lickingswcd.com.

Consider electronic delivery to help conserve natural resources and reduce postage costs. Email information@ lickingSWCD.com to sign up. For updates and more activities, visit www. lickingSWCD.com/calendar.
