CELEBRATING 80 YEARS OF CONSERVATION

his year Soil and Water is celebrating our 80th anniversary of serving Licking County!

To celebrate, the logo was updated and celebrations are planned throughout the year. Check out our display at the County Administration building through the end of January to see fun throwback pictures and more! We even have old newsletters on display so you can see how we started and where we are now.

The official Charter Day was March 17th, 1944. Join us for an Open House Celebration on March 15th, 2024 from 4–6 pm at the Ag Service Center as we reminisce about the past and look forward to the next 80 years! RSVP at LickingSWCD.com/news-events or call 740-670-5330.

- Urban Trees and Benefits
- Free Trees for Students
- River Round Up Poster Contest for School-age Students
- Important Dates

STREAM TEAM OPEN HOUSE

re you interested in learning more about the health of Licking County rivers and streams? You're in luck! Soil and Water is hosting an open house on February 21st from 5:30–7:30 pm at the Agriculture Service Center. Come out and learn about our Licking County Stream Team and the status of our streams and rivers with Watershed Specialist Kyle Seitz, Conservation

Educator Deirdre Wise, and Outreach Coordinator/Stormwater Educator Abbie Hogue. Staff will be highlighting historical trends of water quality in the county and the excellent work of our Stream Team Volunteers. A light meal will be provided. To RSVP scan the QR code below or contact Kyle Seitz at 740.670.5337 or KyleSeitz@LickingSWCD.com.

STREAM TEAM TRAINING

icking County Stream Team is a Citizen Science Water Quality program focused on the health of our county's streams and rivers. Volunteers will be trained and equipped with the knowledge to identify common orders of macroinvertebrates, assess the health of the stream and surrounding habitat, and test for some common chemical parameters, including dissolved oxygen, nitrate, and phosphate. Through these metrics, volunteers will gain an understanding of the holistic health of a waterway and determine the potential sources of impairments.

Upon the completion of training, interested participants will be equipped with a stream team kit and assigned a location. Participants must provide their own footwear, preferably tall boots or waders, and commit to a regular testing schedule from April—October annually. Details about the program can be found at www. https://lickingswcd.com/ how-to-help.

The first Stream Team Training of 2024 will be held on April 2nd at Karr Park in Pataskala from 5:30 pm to 7:30 pm. Additional training is being finalized for the rest of the year.

To RSVP for the April training or have questions about the program, please contact Kyle Seitz via email KyleSeitz@LickingSWCD.com or call 740.670.5337. You can also use the QR code below.

Office Hours: 8:00 AM - 4:30 PM Monday - Friday Closed Federal Holidays

The Soil & Water Board meets on the second Tuesday of the month at 4:30 PM at the Soil & Water office. The public is welcome to attend.

USDA is an equal opportunity provider, employer, and lender.

JOIN OUR TEAM!

We are hiring! Licking Soil & Water is looking to expand; we are searching for a Stormwater Specialist.

The Stormwater Specialist assists with implementation of the County's and local community's erosion and sediment control and stormwater programs. The position will review development plans and stormwater reports: for compliance with State, County, and local stormwater regulations as a part of the County Technical Review Committee. Must communicate regularly, providing updates for projects, plans, and program statuses with the Stormwater Manager. See more in the job description or learn how to apply at www.LickingSWCD.com.

CONSERVATION STEWARDSHIP PROGRAM (CSP)

Program (CSP) offers technical and financial assistance to help agricultural and forest producers take their conservation efforts to the next level. The program is designed to compensate agricultural and forest producers who agree to increase their level of conservation by adopting additional conservation activities and maintaining their baseline level of conservation. CSP is for producers who are passionate about conservation and environmental stewardship.

CSP may provide many benefits, including increased crop productivity, decreased inputs, wildlife habitat improvements and increased resilience to weather extremes. CSP also encourages adoption of new technologies and management techniques.

For more information contact Joe Koehler at our local NRCS office at 771 East Main Street, Newark Ohio 43055. Click the link to visit www.nrcs.usda.gov/programs-initiatives/csp-conservation-stewardship-program.

TIMBER HARVEST

Interested in harvesting your woods? Here's what you should know before you cut to avoid loss of profit and damage to your woods. Be aware of scams. Many people will attempt to offer you a low price and not the true value of your trees. Make sure your resource is reputable and check the call before you cut website, www.callb4ucut.com. To avoid this issue, know your objectives; why do you want to harvest? Forest health, profit, safety? A professional forester will help you reach your goals. Be knowledgeable in the value of your woods, and have an

inventory. Working with your forester and logger closely on your plan is important. Contact a local forester for more information and start the harvest process. To find a forester go to www.callb4ucut.com. Licking county ODNR Service Forester is Adam Komar, contact him at Adam.Komar@dnr.ohio.gov or 740.961.0194.

2024 SEEDLING TREE SALE

NATIVE SHRUBS, SMALL TREES, FRUIT BEARING

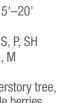

Allegheny Serviceberry Mature Height: 15'-35'

Mature Width: 15'-20' Growth Rate: M Light Required: S, P, SH Soil Moisture: D, M

Soil pH: A

Comments/Uses: multi-trunk understory tree, showy white flowers that drop edible berries

Buttonbush

Mature Height: 5'-12' Mature Width: 4'-15' Growth Rate: M Light Required: S Soil Moisture: W Soil pH: N

Comments/Uses: round shape, tolerates very wet soil, cluster white flowers that attract pollinators

Get in touch with your roots and order your trees today online at www.LickingSWCD.com.

Elderberry

Mature Height: 6'-13' Mature Width: 5'-12' Growth Rate: F Light Required: S, P Soil Moisture: W Soil pH: A, N

Comments/Uses: dark edible berries, showy white flowers, attracts wildlife & birds

Heritage Red Raspberry

Mature Height: 4'-5' Mature Width: 3'-4' Growth Rate: F Light Required: S Soil Moisture: M Soil pH: A, N

Comments/Uses: self-pollinating variety known to produce several crops, one in midsummer and a larger second in fall

White Flowering Dogwood

Mature Height: 20'-30' Mature Width: 20'-25' Growth Rate: M-S Light Required: S, P Soil Moisture: M

Comments/Uses: beautiful white flowering tree,

Duke Blueberry

Mature Height: 3'-5' Mature Width: 3'-4' Growth Rate: F Light Required: S Soil Moisture: M Soil pH: A

Comments/Uses: large, quarter-size berries that ripen in June, self-pollinating, recommended to plant two or more

Persimmons

Mature Height: 40'-50' Mature Width: 25'-30' Growth Rate: M-S Light Required: S, P Soil Moisture: M, W Soil pH: N

Comments/Uses: edible fruit, fragrant white flowers, wildlife and pollinators

Soil pH: A

with scarlet red berries and leaves in fall

Winterberry

Mature Height: 3'-12' Mature Width: 3'-12' Growth Rate: S-M Light Required: S, P, SH Soil Moisture: M, W

Soil pH: A

Comments/Uses: round, male & female will produce showy red berries, not safe for human or pet consumption

Burr Oak

Mature Height: 60'-90' Mature Width: 40'-80' Growth Rate: S Light Required: S, P Soil Moisture: D, M Soil pH: A, N, B

Comments/Uses: syrup, timber, wildlife and pollinators

Butternut

Mature Height: 40'-60' Mature Width: 30'-50' Growth Rate: S Light Required: S Soil Moisture: M Soil pH: N

Comments/Uses: wildlife habitat (bat roosting in flaking bark), and timber

Red Maple

Mature Height: 40'-70' Mature Width: 30'-50' Growth Rate: M Light Required: S, P Soil Moisture: W Soil pH: A

Comments/Uses: lovely fall foliage, wildlife and timber

Red Oak

Mature Height: 50'-60' Mature Width: 50'-60' Growth Rate: F Light Required: S Soil Moisture: D, M Soil pH: N

Comments/Uses: tolerates dry conditions, timber, and landscaping

River Birch

Mature Height: 40'-70' Mature Width: 40'-60' Growth Rate: F Light Required: S. P Soil Moisture: M, W Soil pH: N

Comments/Uses: reputation as tough species, ornamental or street tree, thrives in moist soils. showy bark

Shagbark Hickory

Mature Height: 75'-100' Mature Width: 40'-70' Growth Rate: M-S Light Required: S. P. Soil Moisture: M Soil pH: A. N

Comments/Uses: wildlife, large tree at maturity, long-lived and offers deep shade

NATIVE LARGE CONIFER TREES

Tamarack

Mature Height: 40'-80' Mature Width: 12'-20' Growth Rate: F Light Required: S. P. Soil Moisture: M, W Soil pH: A

Comments/Uses: deciduous conifer with reddish spring cones, decay resistant, wildlife habitat

White Pine

Mature Height: 60'-80' Mature Width: 20'-40' Growth Rate: F Light Required: S Soil Moisture: M Soil pH: A, N

Comments/Uses: timber, windbreak, wildlife

Soil Moisture: Soil pH:

URBAN TREES AND BENEFITS! —

any of our Licking County residents are in urbanized areas and might not have access to large forests, however, many communities have urban trees lining their streets. Urban trees are important and provide services to city residents. The benefits we all know, like cleaner air, are great, but urban trees also provide cooler temperatures, healthier residents mentally and physically, and higher property values. Research also shows trees can reduce stormwater runoff. Stormwater runoff is traditionally managed with infrastructure piping precipitation to surface water or wastewater treatment plants. Green infrastructure efforts like rain gardens and bioswales offer alternatives that are better for environmental health. Trees in urban environments can reduce stormwater runoff by canopy capture, transpiration, and soil infiltration. Interested in benefits for your area? Check out iTree, a tool to evaluate tree benefits.

MyTree Benefits

Over 20 years.

Red maple, (Acer rubrum)

Serving Size: 30.00 in. diameter

Condition: Good

Location: Newark, Oh, United States

Expected over 20 years: \$867.78

Tractor Requirements – 55 hp Planting Width – 10 feet Total Width – 10 feet 6 inches

FREE TREES FOR STUDENTS

icking Soil & Water is offering free trees to students through the generous support of our sponsors, thank you! Seedling trees are given to elementary and middle schools that serve Licking County students. We offer two options to schools to participate in this program that allows students to gain a sense of stewardship towards the land.

Option 1 is that each student at a participating school or class receives a seedling tree to take home to plant. This option is ideal for schools where students have a place at home to plant a tree.

For option 2, you can request a certain number of trees to be planted on your school grounds. This option is perfect for enhancing an outdoor classroom and allows all students to have ownership and responsibility for the trees planted at their school.

Benefit estimates are based on USDA Forest

Service research and are meant for quidance only.

The free trees will be available for pick up at our office on Friday, April 19th between 8:30 am and 7:00 pm. The deadline to reserve your free trees is Friday, March 22nd.

If you are interested in reserving free trees for your students or school, please contact Deirdre Wise at DeirdreWise@LickingSWCD.com or 740-670-5333.

ENTER THE 2024 RIVER ROUND UP POSTER CONTEST TO WIN CASH PRIZES!

he 2024 River Round Up Poster Contest is open to all school-aged youth living in Licking County.

Posters should reflect water pollution awareness and encourage volunteer participation in the 29th Annual River Round Up. The deadline to submit posters is April 5th, 2024.

Posters will be judged in three age categories: Elementary (K–4), Middle School (5–8), and High School (9–12). One winner will be chosen from each age category. Prizes will be awarded to students and their respective schools.

Poster Awards: \$100 to the student artists of the winning posters from each of the categories and \$500 to the student's school for advancing science

and art programming. The winning poster artwork will be the primary electronic marketing images used for the 2024 River Round Up event.
